Education

Indian Institute of Information Technology, Una — Una, Himachal Pradesh, India
B.Tech in Information Technology; — *2023–2027*

Central Board of Secondary Education (CBSE) — RPS Mahendergarh, Haryana, India
Senior Secondary (Class XII) — *2022*

Experience

Frontend Developer, *CodeWithJay* (Intern) — *Mar 2026 – May 2026*
React.js, Redux Toolkit, Performance Optimization — *Remote*

- Led migration from **Context API to Redux Toolkit**, reducing redundant API calls by **70%** and improving state management efficiency.
- Built an interactive **course platform** with **video bookmarking** and **progress tracking**, used by **15,000+ users**.
- Optimized frontend performance using **lazy loading** and **code splitting**, improving page load speed by approximately **15%**.

Full Stack Developer, *Infrawave Solutions* (intern) — *Jan 2025 – Jul 2025*
Node.js, Express.js, REST APIs, Generative AI/LLM APIs, GitHub Actions — *Remote*

- Engineered **50+ scalable REST APIs** using **Node.js and Express**, reducing response time by **40%** and improving overall system performance for production applications.
- Integrated **Generative AI/LLM APIs** to build an AI-powered resume intelligence feature, implementing automated **ATS score evaluation** and generating tailored interview questions from user resumes.
- Automated **CI/CD pipelines** using **GitHub Actions**, cutting deployment time from **15 minutes to under 45 seconds**, while collaborating on code reviews and sprint planning.

Projects

- **Autonomous Coding Agent – Agentic AI Code Generation & Execution Platform**
  Technologies: LangGraph, LangChain, Python, FastAPI, React.js, TypeScript, Node.js, MongoDB, Docker, AWS EC2, LangSmith — Live | GitHub
  - Architected a **multi-agent LangGraph and LangChain workflow** (Planner → Coder → Repair → Verifier) with **FastAPI** that converts natural-language tasks into Python code, executes it, and **self-corrects runtime errors**, solving **95%** of **50** benchmark tasks in an automated **evaluation suite**.
  - Engineered a **secure Docker sandbox** for untrusted **LLM-generated code** with CPU/memory/PID limits, timeouts, and non-root execution, and built a **multi-LLM integration** (OpenAI, Anthropic, Gemini, Groq) with tool calling, token/cost tracking, and **LangSmith observability**.
  - Developed a full-stack **React.js, TypeScript, and Node.js** platform with **JWT authentication**, **MongoDB**, and **Socket.IO real-time streaming**; deployed **Dockerized microservices** on **AWS EC2** with **Nginx reverse proxy** and **HTTPS**.
- **KaamSetu – Real-Time Worker Hiring and Job Matching Platform**
  Technologies: React.js, Node.js, Express.js, MongoDB, Socket.IO, Cloudinary, JWT, OCR APIs, Tesseract.js — Live | GitHub
  - Engineered a **full-stack worker hiring marketplace** using the **MERN stack**, developing **REST APIs, role-based workflows, job management, and real-time communication** to connect workers and employers across local markets.
  - Implemented a **document verification pipeline** using **Tesseract.js OCR** with image preprocessing (deskewing, denoising, binarization, and resolution normalization), integrated with **Cloudinary** for secure document storage and automated profile verification.
  - Developed **JWT authentication**, **Role-Based Access Control (RBAC)**, geospatial job discovery using MongoDB **2dsphere** and **$geoNear**, and **Socket.IO**-based real-time messaging, supporting **100+ concurrent users** with scalable worker–employer matching.

Skills

- **Programming** : JavaScript (ES6+), TypeScript, Java, Python
- **Backend Development** : Node.js, Express.js, RESTful APIs , FastAPI, JWT Authentication, Next.js Socket.IO
- **Frontend Development** : HTML, CSS, React.js, Next.js, Redux, TailwindCSS, TypeScript, shadcn UI, Responsive UI Design
- **Databases & Storage** : MongoDB, MySQL, Cloudinary
- **Tools & Collaboration** : Git, GitHub, GitHub Actions (CI/CD), Postman, Vercel, AWS, Docker, Render, Agile Teamwork, Cross-Functional Collaboration.
- **Agentic AI & Gen AI** : LangGraph, LangChain, Vector Database , Retrieval-Augmented Generation (RAG), MCP(model context Protcol), LLM Integration, Prompt Engineering, Tool Calling, Agentic Workflows, Embeddings

Key Courses Taken

- **Core Subjects** : Data Structures and Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, Database Management Systems (DBMS), Computer Organization, Discrete Mathematics, Engineering Mathematics, System Design

Achievements

- **Winner – IIIT Una Progathon** : Collaborated under strict time constraints to secure **1st Place** in an inter-college hackathon as part of a team.
- **LeetCode** (Knight Tier, 1900+): Solved **500+ problems** across **DP, Graphs**, and advanced Data Structures, reflecting strong analytical ability.
- **Codeforces :** Achieved Specialist rank with a 1600+ rating in competitive programming.

Extracurriculars

- **Football Captain – IIIT Una** Led the institute football team, building strong interpersonal relationships and driving strategy for inter-college tournaments.
- **Technical Member – IIIT Una Website** Collaborated with a cross-functional student team to develop and maintain the institute website, improving UI/UX and responsiveness.
